

Hydro Power Projects - Albania

Development of CDM projects in Albania

Together with company ALLPLAN denkstatt is developing CDM projects in the renewable energy sector in Albania.

Albania currently enables the construction of both - small and large - hydro power plants. Through the use of the CDM mechanism respectively the sales of CERs from those projects our clients generate additional income and financing of their projects.

We support our clients through the whole range of the CDM project cycle.

Our **services** in these projects cover following items:

- Additionally Check; Selection of base lining methodology
- Development of the PDD (Baseline Study, Monitoring Plan)
- Communication with the national authorities
- Support during the validation of the projects
- Quality management and -control
